

TRELLEBORG - STOCKHOLM NETWORK CONNECT

A fast and climate-smart solution between Trelleborg and Stockholm

Our unique ability to combine resources in the network enables us to provide high departure frequencies, fast lead times and punctuality. The solution is optimized for intermodal transportation of trailers, containers, tank containers and swap bodies.

The ability of our network to meet varying demands for everything from individual load carriers to large even flows comprises a major strength. We connect through the terminals at the Port of Trelleborg through Nässjö* and then directly to Årsta in southern Stockholm, and back. At the terminals, we can handle all types of standardized load carriers and goods types. At each departure, there are wagons that can take trailers, containers, tank containers and swap bodies.

*Nässjö traffic starts on March 1, 2022.
